PATIENT SAFETY ADVERSE EVENT REPORT
CONFIDENTIAL // FORENSIC INVESTIGATION RECORD

CLINICAL SAFETY BOARD - EXPEDITED AE SUMMARY
Trial: HL-902-ONC | Drug: Velocept-4
Date: August 22, 2024
Findings: Five patients enrolled in Cohort 3 developed severe injection-site necrosis and acute fever within 12 hours of receiving doses from Batch HL-902B.
Analysis: Chemical degradation of hydrolyzed adjuvant occurred due to thermal excursion.
